DESPITE FUEL AND INTEREST RATE RELIEF, ECONOMIC CONDITIONS EXPECTED TO REMAIN TOUGH THROUGH 2009

Although the 2008 festive season started off on a positive note when the R1.60/litre petrol price decline in early December was followed by a 50bps interest rate reduction on December 11, the domestic consumer (and economy in general) is projected to remain under considerable pressure for the foreseeable future. In particular, the global economic woes are set to weigh on local growth.

The impact of the global financial crisis, which intensified dramatically during September/October 2008, on the real economies of countries such as the US and UK will only really be reflected in the 2008Q4 and 2009Q1 GDP growth numbers. The US already suffered negative growth (-0.5% quarter-on-quarter) in 2008Q3, but the figures for the current quarter (Q4) and early 2009 are set to be substantially weaker.

Because South Africa is a small (open) economy, poor international growth is expected to weigh heavily on the domestic economy through reduced export volume growth. Measured on a quarter-on-quarter (seasonally adjusted and annualised, or saar) basis, SA GDP growth already slowed sharply from 5.1% in 2008Q2 to only 0.2% during Q3. Indicators such as the Investec Purchasing Managers Index (PMI), which provides an up-to-date snapshot of conditions in the manufacturing sector, suggest that further growth moderation is on the cards. The PMI declined to a record low of 39.5 index points during November. A reading below 50 indicates contraction of manufacturing activity. The PMI readings for a number of other countries, including the US and China, also plummeted to new lows in November.

While domestic interest rates are expected to decline further, consumer spending may first weaken further before a recovery sets in. The SA Reserve Bank's (SARB) December 2008 Quarterly Bulletin indicated that the consumer was under even more pressure than previously thought during 2008Q3. Overall household consumption expenditure declined by 0.8% quarter-on-quarter (saar) in Q3, the first fall since 1998Q4 (-0.2%). Before then, total household spending last declined in 1993Q3 (-1.8%). On an annual basis, household expenditure moderated to 1.8% year-on-year from 3.3% in Q2. Going forward, consumer spending should be boosted by the lower fuel costs and interest rate reduction(s), but these positive developments may to a degree be nullified by very weak employment prospects.

A number of sectors, most notably mining, are set for big job cuts in the current environment, which will erode the spending power of consumers. At this stage, the BER only expects a consumer demand recovery from the second half of 2009. With private sector investment and export growth also projected to be particularly weak in 2009, overall GDP growth is expected to moderate to below 2% next year with a number of downside risks. Although the BER's current forecast for real GDP growth suggests that an outright contraction will be avoided, the danger of a recession proper (2 consecutive quarters of negative growth) has increased substantially.

A growth recovery is only expected from 2010 when the economy is projected to expand by 3.6%. A return to the 5% growth environment prevalent from 2003 to 2007 is not expected anytime soon as the world economy is set to struggle to regain traction.

- Stats SA changed the way in which the PPI is measured in January 2008. The PPI for domestic output is now the headline (or all items) PPI. The PPI no longer measures the input costs of producers, but rather the price that domestic producers receive for their goods, whether it is sold domestically or exported.

BER PUBLICATIONS AND SERVICES

Business surveys

Building and Construction: the results of a quarterly survey amongst architects, quantity surveyors, building contractors, building sub-contractors and civil engineers are interpreted and presented in graphs and tables in this report; also contains information on macro-economic developments, the property market and the BER's building cost index.

Manufacturing survey: the results of a quarterly survey amongst manufacturers are interpreted and presented in graphs and tables in this report; the following sectors and provinces are covered: food, beverages, textiles, clothing, furniture, paper, printing, publishing, chemicals, non-metal minerals, basic metals, metal products, machinery, transport, plastics, Western Cape, KwaZulu-Natal and Gauteng.

Retail survey: the results of a quarterly survey amongst retailers, wholesalers and motor dealers are interpreted and presented in graphs and tables in this report; also contains information on the BER's consumer confidence index.

Macro-economic forecasting

Economic Prospects: current economic trends and forecasts of e.g. inflation, exchange rates, interest rates and private consumption expenditure up to eighteen months ahead are summed up in this quarterly report; trends that are detailed in the main report are updated in monthly newsletters.

BER Macro service: this is a comprehensive economic consultancy service with the central focus on analysing and forecasting the broad macro-economic environment in the short run (next eighteen months) and medium term (next 6 years) and its impact on the micro company level. This information serves as valuable input to organisations to strategically position and align themselves in an increasingly volatile and globalised market place.

Economic data provision

Trends: the latest South African and international economic data is presented in tables and graphs in this report.

NumBERs: key monthly, quarterly and annual economic data (domestic and international) sent to you in excel format together with a graphic power point presentation of the most important economic indicators (including a 2-year forecast of key variables like GDP, inflation and interest rates).

Other services

Short courses in practical economics: these courses are directed at those that do not hold economic degrees; this two-day course is presented in Stellenbosch, via live interactive satellite based television and in-house to larger groups.

Conferences, seminars and in-house presentations: these services bring executives up to date with the latest developments and prospects.

Cost available on request.
